

<b>Training</b>	Alphapilot MFM
<b>Module(s)</b>	Alphapilot MFM
<b>Target group</b>	Service Engineers
<b>Location</b>	Rotterdam Office (Schaardijk 23, 3063NH, Rotterdam)
<b>Duration</b>	3 days
<b>Price</b>	€184,00 per day

### DESCRIPTION

This Alphapilot MFM training is based on installation, commissioning, operation and maintenance. During the training we will go in depth on the connections, components and settings of the unit as well as updating all components. We will use a simulator to give us the possibility of performing commissioning during seatrials while standing on dry land.

### CURRICULUM

Some of the key points covered in this training (in both theory and practice) are:

- System and components explanation
- Installation and commissioning of Alphapilot MFM
- Regulations regarding the autopilot
- Updating components

### ENTRY REQUIREMENTS

- Basic understanding of autopilot
- Basic understanding of steering system
- Service engineer must be employed at distributor in Europe, Russia, Africa or Middle East
- Service engineer is recommended to have at least one year of field experience

### CERTIFICATION

- This course ends with an examination on the last day, the service engineer is required to achieve a pass mark of 70% in order to receive a certificate
- With this certificate of competence the service engineer will be allowed to perform the installation, operation, maintenance and commissioning of the Alphapilot MFM
