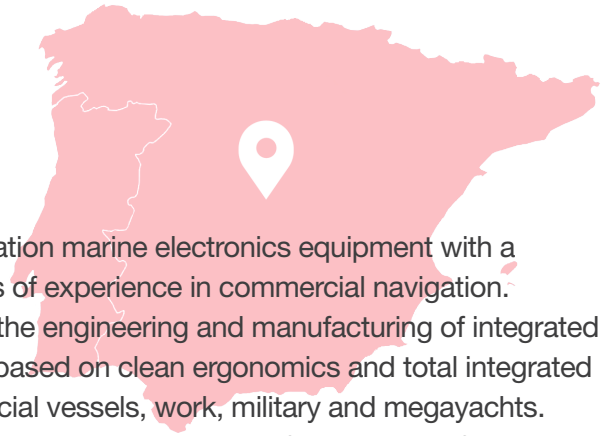
Alphatron Marine Iberia

Redefining marine electronics

alphatronmarine.com | jrc.am

Introducing



JRC manufactures high quality navigation and communication marine electronics equipment with a recognized international reputation endorsed by 100 years of experience in commercial navigation. Alphatron Marine leads the technological development in the engineering and manufacturing of integrated bridges for more than 25 years. Its AlphaBridge concept, based on clean ergonomics and total integrated functionality, is a market reference for all types of commercial vessels, work, military and megayachts. Since 2014, JRC and Alphatron Marine have been integrated into one company, forming one of the largest international networks specialized in the design, manufacture, supply and maintenance of naval electronics.

Alphatron Marine Iberia

Alphatron Marine Iberia is one of the latest additions to JRC/Alphatron´s network responsible for service, sales, technical support and training. Alphatron Marine Iberia is your first stop for JRC/Alphatron Marine sales and service in Spain and Portugal.

Empresa Instaladora Marina Mercante - **M1**

Service

We are ISO9001 certified and approved by NKK, Bureau Veritas, Lloyd´s Register and DNV-GL classification societies for radio surveys and VDR APT's. Also M1 registered for Spanish flagged vessels. Our experienced staff strives for First Time Fix in each individual service call and has received factory training in all the equipment we sell and service.

Sales

Alphatron Marine Iberia offers a wide selection of JRC, Alphatron Marine and complementary products. With headquarters located in Madrid and an extensive stock of products and spares in our 850m² premises, we are ready to ship equipment and spares to any point of Spain and Portugal in one-day delivery.

AlphaBridge

Alphatron Marine Iberia is happy to assist with a custom designed AlphaBridge for newbuild projects. The ergonomic design of the AlphaBridge follows regulations and enables intuitive, comfortable operation, which enhances the safety of your vessel. A unique facility to adjust the height of monitors and the work shelf in eight increments means that AlphaBridge is the first system to enable navigation and communication equipment operation from both a seated or standing position.

Network

Alphatron Marine Iberia has developed an extensive network of fully certified collaborators specialized in marine electronics onboard merchant and fishing vessels, workboats and high-end leisure crafts operating along the Spanish and Portuguese shoreline. Together with our certified and highly skilled technical staff in charge of evaluating, coordinating, executing services, we count on our certified network of approved and trained sub-dealers totalizing 27 stations and 60+ engineers in Spain and Portugal.

Markets

- v Deepsea
- v Government fleets
- v Port service workboats/vessels
- v High seas and coastal fishing
- v High end megayachts
- v Simulators and nautical schools
- v Integrated bridges and consoles

Customers

- v Dealer network and service partners
- v Shipyards
- v Shipowners and shipmanagers
- v Government and military

Training

Alphatron Marine Iberia's classroom in Madrid is part of JRC/Alphatron Marine´s Global Training Academy worldwide with training centers including Tokyo, Singapore, Houston and Rotterdam. Our fully certified training staff has been appointed "Train the Trainer" by JRC Tokyo and has a long experience in certifying engineers for the correct installation and repair of marine electronics. A fully equipped 100m² classroom is the core center of our training facilities where engineers of our sub-dealers are certified periodically.
