

<b>Training</b>	FleetBroadband and Global Xpress
<b>Module(s)</b>	JUE-251, JUE-501, JUE-60GX
<b>Target group</b>	Service Engineers
<b>Location</b>	Rotterdam Office (Schaardijk 23, 3063NH, Rotterdam)
<b>Duration</b>	3 days, Wednesday-Friday
<b>Price</b>	€184,00 per day

## DESCRIPTION

This training examines the installation, operation, maintenance, and commissioning of JRC's FleetBroadband models JUE-251 and JUE-501 & and Global Xpress JUE-60GX (all operating via Inmarsat). The JUE-251 and JUE-501 are similar products but mainly different in scope, speed and therefore size. The 251-model weighs 4.7 kg whereas the 501-model is 20 kg. Although they can be used separately, they are usually connected to the JUE-60GX. There's enough opportunity to try out newly learned knowledge on our test equipment.

## CURRICULUM

Some of the key points covered in this training (in both theory and practice) are:

- Product specifications
- System overview
- Installation
- Commissioning
- Troubleshooting/repair
- Replacing parts of antenna
- Software update procedures (where appropriate)
- Technical developments relating to our products

## ENTRY REQUIREMENTS

- Basic knowledge of Windows
- Basic knowledge of radar electronics
- Understanding of industry standards IEC61162-1 and IEC61162-2
- Service engineer must be employed at distributor in Europe, Russia, Africa or Middle East
- Service engineer is recommended to have at least one year of field experience

## CERTIFICATION

- This course ends with an examination on Friday, of which the service engineer is required to answer at least 70% correctly in order to receive a certificate
- With this certificate the service engineer is allowed to perform the installation, operation, maintenance, and commissioning of the JUE-251, JUE-501 and JUE-60GX
